MANIFESTO 2027 TO 2032

Water at every gate. Work on every street.

The Kibra Plan: six promises, what each one costs in time and effort, and how you will be able to check that we kept them.

Jay Boge

Independent candidate for Member of Parliament, Kibra Constituency

Sample document for the ChatKE demo campaign

Why this plan

For fifteen years I have organised in Kibra: savings groups, clean-ups, school feeding. I have seen what works when neighbours run things together, and what fails when money disappears between the budget and the street.

This plan is short on purpose. Every promise in it has a number you can check, and every shilling we spend will be published on our campaign site. If we do not deliver, you will know, and you should vote us out.

01 Clean water at every gate

02 Work for young people

03 Bursaries for the right child

04 Health care close to home

05 Lit, safe streets

06 Room for traders to grow

PILLAR 01

Clean water at every gate

A metered water point within 200 metres of every home, run by the community.

Nobody should spend their morning queueing for water they cannot trust.

We will map every household that walks more than ten minutes to a tap, and put a metered water point within 200 metres of each, run by a residents' committee with prices posted on the kiosk.

Every shilling of the constituency's water budget will be published, project by project.

What we commit to

- Map every household more than ten minutes from a tap in the first 100 days
- A residents' committee runs each new water point, with prices on the kiosk
- The water budget published project by project, every quarter

---

PILLAR 02

Work for young people

A jobs desk that matches young people to real work, and pays apprentices while they learn.

Talent is everywhere in Kibra. Opportunity is not.

A constituency jobs desk will match young people with employers, contractors and county projects, starting with the work being done in our own wards.

Apprentices on public projects will be paid while they learn a trade, so nobody has to choose between training and eating.

What we commit to

- A jobs desk open six days a week in every ward
- Paid apprenticeships on every public works project
- Local hiring targets published for each contract

PILLAR 03

Bursaries for the right child

Every bursary decision published, with a clear way to appeal.

Bursaries should follow need, not connections.

The committee's criteria, the list of beneficiaries and the amounts will be published every term. Any parent can appeal a decision, and appeals will be heard in public.

What we commit to

- Criteria and beneficiaries published every term
- A public appeals hearing each term
- Applications open by SMS as well as on paper

PILLAR 04

Health care close to home

Longer clinic hours, stocked shelves, and community health promoters paid on time.

A clinic that closes at four is no use to a family that works until six.

We will push for evening clinic hours, publish stock levels for essential medicines, and make sure community health promoters are paid on time, every month.

What we commit to

- Evening clinic hours until 8pm
- Stock levels for essential medicines posted weekly
- Health promoters paid by the 5th of every month

PILLAR 05

Lit, safe streets

Street lights and passable paths on every main route, built with local labour.

Women and children should be able to walk home after dark without fear.

We will light every main path and fix the worst drainage first, hiring local labour so the money stays in the constituency.

What we commit to

- Every main footpath lit within two years
- The worst drainage points fixed first, chosen with residents
- Local labour on every lighting and drainage contract

PILLAR 06

Room for traders to grow

Clean market stalls, fair fees and an end to harassment of hawkers.

Traders keep this constituency fed and moving.

We will push for clean stalls with water and lighting, fees that are posted and fair, and a named officer traders can call when they are harassed.

What we commit to

- Water and lighting in every public market
- Market fees posted at every gate
- A named officer traders can call, in every market

Read it. Question it. Share it.
